AB	Poly(ethylene terephthalate) (I) fibers contg. 1-50% polystyrene (II) [9003-53-6], poly(α -methylstyrene) [25014-31-7], or poly(vinyltoluene) [25014-31-7] were halogenated to give fire-resistant products. For example, a I fiber contg. 20 parts (based on 100 parts di-Me terephthalate) II was brominated (satd. aq. Br) at 20.deg. for 2.5 hr in the dark to give a self-extinguishing product (9.8% Br).
